MELFORM - Innovation and Quality in Thermal Transportation

For over 50 years, MELFORM has been a partner in the design and production of solutions for isothermal transport. Based in Italy, the company offers a complete range of isothermal and refrigerated containers for the storage and transport of food and pharmaceutical products, ensuring maximum efficiency and safety at every stage of the cold chain.

Our experience, combined with a constant commitment to research and development, allows us to provide tailor-made solutions to meet the logistics and transport needs of our clients, always in compliance with international regulations.

COMPLETE COLD CHAIN SOLUTIONS IN ONE PLACE

 Manufacturers since 1957

Your partner in cold chain solutions

OUR PRODUCTS

Advanced solutions for temperature-controlled transportation

MELFORM caters to the Organized Large-Scale Distribution (GDO), vending companies, and the medical, biotechnological, and pharmaceutical sectors, offering a wide range of isothermal and refrigerated containers. Our solutions ensure maximum efficiency in the transportation of perishable goods, maintaining the cold chain from the production or storage center to the final user. With MELFORM, you can rely on innovative technologies for safe and efficient management of temperature-controlled logistics.

Areas of Application:

MEDICAL AND PHARMACEUTICAL
SECTOR
HO.RE.CA.
CATERING
DELIVERY
LARGE-SCALE DISTRIBUTION (GDO)
VENDING MACHINES

Passive isothermal containers

Refrigerated containers, mobile refrigerators

Battery-powered mobile refrigerators

Isothermal containers for dry ice

Eutectic plates

Accessories and spare parts

WHY CHOOSE MELFORM

QUALITY

High-quality standards to ensure excellent performance, unchanged over time.

DESIGN

Modern and functional design, created to facilitate ease of use.

CERTIFICATIONS

The isothermal and refrigerated containers are suitable for the transport of perishable goods by road, as they are ATP-approved. The NF certification attests to the suitability of the containers for food-related use.

TECHNOLOGY AND MATERIALS

All containers are manufactured using rotational molding technology and made from polyethylene, insulated with polyurethane foam free of CFC and HCFC, ensuring minimal thermal dispersion.

COLD CHAIN

Easy management of the distribution of perishable products without interrupting the cold chain, from the production or storage centre to the end user.

SUSTAINABILITY

Use of recyclable, reusable materials to create new products.

MELFORM has always been synonymous with safety and reliability and can boast a Quality Management system certified according to current international regulations:

UNI EN ISO 9001:2015
Quality management
system

NF par AFNOR
certification

ATP approval
for road transport
of perishable foodstuffs

ATP

- COLD CHAIN EXPERTS
- SPECIALISTS IN REFRIGERATION SYSTEMS:
 - Eutectic plates,
 - CO₂,
 - Compression refrigeration systems
- R&D
- INDUSTRIAL KNOW-HOW

High-performance and innovative solutions for temperature-controlled transport, constantly improving products and services.

We are aware that our business has an impact on the environment. For this reason, we try to make **responsible choices** to **reduce consumption** and **select recyclable materials** that can be reused and put back into circulation.

Our economic model is circular: all our containers are recycled at the end of their operational life to create new products.
